

Lab3-InstallDataFlow

User the Getting Started section found here:

<http://docs.spring.io/spring-cloud-dataflow/docs/1.7.4.RELEASE/reference/htmlsingle/#getting-started-deploying-spring-cloud-dataflow-docker>. The local mode is based on a docker-compose.yml file. For Cloud Foundry connecting to the shell and dashboard were completed in Lab1.

To get the shell you need to manually download it per the instructions here:

<http://docs.spring.io/spring-cloud-dataflow/docs/1.7.4.RELEASE/reference/htmlsingle/#getting-started-deploying-spring-cloud-dataflow>

(Note: 1.7.4 is the current version supported by the tile. It will be upgraded to the latest release of 2.0 by the end of March.)
